1.7. Project summary

Russia's military invasion of Ukraine has not only caused one of the world's most tragic humanitarian crises but resulted in economic devastation that will influence territories far beyond Ukraine's borders. Main project activity is to create a friendly economic environment for woman entrepreneurs and innovators from Ukraine but also from others countries in a similar situation. It includes establishing financial instrument: micro-capital seed fund. Project is territorially oriented at all BS regions. The different economic environment in partnership gives possibility to choose preferred country for each start-up referred to regional specializations. We plan to settle single eco-system for viable or innovative start-up's from Ukraine. BS regions will benefit from boosting entrepreneurship and competitive (knowledge-based) transnational economic relations. All EU members and their economies will benefit from professional activation of vulnerable groups of refugees but what is the most relevant, war immigrants will be supported with professional, long term business oriented help. It will prevent a number of social issues and immigration- related problems. It is worth to mentioned that one of the aspects of recovering from a war or catastrophic trauma in its last phase is taking up professional activity. Rebuilding life anew, is greatly helped by any professional and economic activity. It influences not only economy but also mental wellbeing of populations.

1.8. Summary of the partnership

The consortium is created to reach the target groups from the Baltic regions and is based on relevant experience and expertise in the implementation of international projects of the institutions taking part in the project. Consortium includes partners from Poland, Sweden, Latvia, Denmark, Estonia, Norway, and Lithuania. The partners represent regions, municipalities, business development organizations, technological parks and incubators, what creates a well-structured group of actors that can develop the tools, evaluate them and most importantly share the results with final users. The aim of the RRDA is to conduct activities aimed at the comprehensive development of the Podkarpacie region by concentrating and mobilizing the potential of local communities as well as advisory and service activities in the processes of restructuring, opening and supporting business ventures, promoting the region and acquiring foreign aid funds. From the beginning of its operation, RRDA has been conducting activities aimed at obtaining funds from EU sources, which makes it an experienced partner in the preparation and implementation of projects at the international level. Møre and Romsdal County Council is the popularly elected regional government of Møre and Romsdal county in the northernmost part of Western Norway. The county consists of 26 municipalities of different size. Regional business development is a very important priority for Møre and Romsdal County Council. One of the long term goals, defined in the county development plan for 2021-2024 is : Møre and Romsdal shall have internationally leading business environment and an innovative public sector.. Ventspils High Technology Park (Latvia)-It is part of the regional start-up support ecosystem. DIH in Ventspils helps regional companies become more competitive by improving their business processes and services and products with digital technology. He has several years of experience in training and retraining specialists, both online and offline. Kaunas Science and Technology Park (Kaunas STP) – the largest partner of science and business cooperation in Lithuania. Kaunas STP aims to increase the competitiveness of tech businesses globally by providing the highest-level innovation support services, making efficient use of the resources of innovation ecosystem, developing the community of innovative businesses, and fostering innovation culture within Kaunas region. Erhvervsush Midtjylland (DK) aim of activity is to help Startups and SMEs to reach their goals. They run business consultants in the subject of • Digitization, sale and other economic issues. Tehnopol Science and Business Park is the largest science park in the Baltics and provides enterprises with everything they need for growth, development, and real-life test environments. Tehnopol Startup Incubator helps technology-based startups to develop their business and get investments, using the best mentors from Estonia and Europe.

The RRDA will be the project LP, coordinating and supervising all activities and responsible for project management and communication. RRDA is also be the leader of WP1. RRDA's headquarter is located in the Podkarpackie region, near to the border with Ukraine. Therefore nowadays the region is facing really high level of issues related to the high number of refugees from Ukraine. As Lead Partner, RRDA will be involved at each stage of project's implementation and coordinate the whole process of task performance. RRDA will also be responsible for the dissemination activities. RRDA has been supporting start-ups in the Podkarpackie region for many years and manages AEROPOLIS- Science and Technology Park. So far, RRDA supported the creation of over 2,000 new start-ups and is actively involved in transnational projects. RRDA participated as a partner in two INTERREG Baltic Sea 2014-2020 projects and Led Partner of 3 INTERREG projects: INTERREG Poland-Belarus-Ukraine and INTERREG Poland-Slovakia

Role of the partner organisation in this project:

The main role in the project will be as the connector to end users through the test of pilot actions. As a regional developer we have an extensive network and work closely with municipalities, business development offices, incubators, industry clusters. MRCC facilitate the eco system for the start-ups through our first line service system for entrepreneurs, and can provide best practise from Norway, tools and network that is relevant for the implantation of Pilot Actions. MRCC will provide experience and knowledge related to develop supportive hubs with mentoring skills and to function as door opener for female refugees wanting to start their business. MRCC will coordinate the evaluation process on the basis of findings and results from the Pilot Actions. MRCC will contribute and deliver what is required as partner in WP 1 and WP3, and also deliver what is required to the entire project and partnership.

--	---------------------------------

Role of the partner organisation in this project:

Dalarna Science Park (DSP) has an extensive network and cooperation with municipalities, clusters, investors, and Dalarna University and will involve regional stakeholders in the project. DSP has long experience in supporting sustainable and innovative business ideas as part of the regional and national innovation system. We run an excellent business incubator with available innovation and start-up programs. This experience will be a resource in the joint development of an entrepreneurial toolkit and in the creation of an incubation program for refugee women. DSP will support the shaping of pilot activities and the idea-scouting to attract refugee women to participate in the incubator program. We will provide qualified support to the participants and be able to connect them with other regional and national resources for the best possible outcome. The partner will be involved in all project activities at the regional, national and transnational level.

Role of the associated organisation in this project:

It is important to create a special support mechanism for the development of refugee entrepreneurship, beneficial for this target group, but also for the economy of supporting countries. Main project activity respond to this need, as it is related to creation of friendly economic environment (eco-system) for woman entrepreneurs and innovators originating in Ukraine and others nations in a similar situation, focused on establishing a financial instrument: micro-capital seed fund. We express our support to Kaunas STP and partners involved in the project, addressed for vulnerable group: receiving appropriate qualification trainings and employment, which will not only enable them to meet their basic needs but allow them to develop professionally.

Role of the associated organisation in this project:

The Associated Partner will have a supportive role in this project. This organisation is part of the first line service system in Møre and Romsdal, in the municipality of Sunndal. They provide service and advice for start-ups, also towards immigrant start-ups. Sunndal is recipient of many refugees from Ukraine, and receive a high number of refugees per inhabitant. Because of this they will both contribute and benefit in being an associated partner. They will be a part of the implementation of the Pilot activity, especially in WP2, but also deliver information and what is needed in WP1 and WP3. They will also participate as stakeholder in the regional group that will work with this project.

3. Relevance

3.1 Context and challenge

Currently all Europe- including BSR countries -is strongly involved in helping Ukraine heavily impacted by Russian military invasion. An ongoing refugee crisis began in Europe in late February 2022 . Almost 5.2 million refugees have left Ukraine and 90% of them are women and children. The invasion caused one of the largest refugee crisis after the II World War with the highest refugee flight rate globally. The current situation is a huge challenge for EU countries especially in providing this vulnerable group with the possibility of receiving appropriate qualification trainings and employment, which will not only enable them to meet their basic needs but allow them to develop professionally. Very soon other EU countries and regions, including Baltic Sea regions will face similar scale of challenges as Eastern and Central Europe due to upcoming wave of refugees from Ukraine as we are observing an ongoing relocation process from Eastern countries to all others in EU. Taking this into account, in addition to the social assistance offered, it is important to create a special support mechanism for the development of refugee entrepreneurship, beneficial for this target group, but also for the economy of supporting countries. In many countries of the Baltic Sea region there is a problem with the possibility of employment for women. There is a great demand for manual laborers, mainly male-oriented but not so much job offers for women, and now we need a lot of such. Women's professions in these regions are still at a deficit. With this project, we want to contribute to the development and improvement of the professional situation of women who are coming to our countries.

1,695 / 2,000 characters

3.2 Transnational value of the project

The partnership in the project is well planned and structured. It consists of representatives of the countries most often targeted as refugee destinations. In order for all goals to be achieved and realized, cross-border cooperation is essential. Each of the Partners contributes the knowledge gained as a result of working with migrants in their regions. As we have not faced such a migration crisis in this century, it is not possible for any of the partners to tackle this challenge alone. An important element during the implementation of our project, the exchange of knowledge acquired in each region will be important, which will allow the creation of a uniform cooperation system for the regions covered by the project activities.

As mentioned earlier, the countries involved in the implementation of the project are the target countries for many refugees from the regions of Ukraine. Countries such as Norway and Sweden have a wide range of initiatives aimed at migrants, which is an important element. Other countries, such as Lithuania, Latvia and Estonia, are countries that, just like Poland, need a lot of support and international cooperation with various institutions from other countries in order to give the best "start" to refugees who have been forced to leave their country. Poland has received the largest group of refugees, therefore an important action is to take this type of initiative, in particular in the Subcarpathian region, which is closest to the border, and it is here that refugees take their first steps on Polish territory. The involved Science and Technology Parks will be a valuable support in developing a startup development strategy. It is the knowledge necessary to achieve the assumed goals of the project.

3.3 Target groups

Target group	Sector and geographical coverage	Its role and needs
<p>Interest group</p>	<p>Refugee women from areas affected by military activities (mostly Ukraine, Syria). Female refugees who came to partner countries. All EU members and their economies will benefit from professional activation of vulnerable groups of refugees but what is the most relevant, war immigrants will be supported with professional, long term business oriented help.</p> <p>355 / 500 characters</p>	<p>The main target group for the activities in our project are women from countries covered by military activities - mainly from Ukraine. As a large number of such people have recently arrived in the countries around the Baltic Sea, they show a great need for assimilation and the possibility of improving their economic situation. The main need is to find oneself in an unknown territory. They show a great need for integration with BSR society. Is important to create a special support mechanism for the development of refugee entrepreneurship, beneficial for this target group, but also for the economy of supporting countries. Main project activity respond to this need, as it is related to creation of friendly economic environment (eco-system) for woman entrepreneurs and innovators originating in Ukraine and others nations in a similar situation.As mentioned in the previous section creating new jobs for them is a big challenge.The possibility of their personal development is also a great need</p> <p>1,000 / 1,000 characters</p>

Target group	Sector and geographical coverage	Its role and needs
<p>Business support organisation</p>	<p>BSO from partnership regions - Poland, Norway, Denmark, Estonia, Lithuania, Latvia, Sweden. The sectors of business support are business development, digitalization, recruitment, work environment and internationalization. The partners are business support organizations from Sweden, Latvia, Denmark, Estonia and Norway and Poland, but all partners will collaborate with local business support organizations. Project partners will also work with BSOs from other BSR countries</p> <p style="text-align: right;">474 / 500 characters</p>	<p>In several partnership regions, activities addressed to migrants, have already been carried out. These target groups will be engaged to (from one side) share their good practices in terms of migrants support and (on the other side) to learn and develop programs and ideas to support migrants - in this case refugee women. These organizations will provide advisory activities in the subject of development and running of own business in line with relevant regional law regulations. The role of BSO is to engage companies to the project. They are involved in all phases of the project. The project supports and increases the collaboration between start-ups and companies and will create new and improve the quality of existing business support services. BSO will help the project by providing the knowledge of current situations and ideas for the pilots. They have extensive expertise on local business needs and are able to engage the companies with the project.</p> <p style="text-align: right;">960 / 1,000 characters</p>
<p>Education/training centre and school</p>	<p>The project focuses on the creation of friendly economic environment (eco-system) for woman entrepreneurs and innovators originating in Ukraine and others nations in a similar situation, focused on establishing a financial instrument. Organizations with best practices and data co-creation methods and living lab models in an international environment. The partners will engage education /training centre and school and collaborate with them to promote education among refugees.</p> <p style="text-align: right;">477 / 500 characters</p>	<p>The project will collaborate with Education/training centre and school by running courses to rise skills of refugees/migrants. Education expertise will provide a broad understanding of the current and future situation of work life globally. Previous national and international projects are an important resource. The target group is involved in all phases of the project. Support in the project will not only focus on searching for business ideas and establishing companies, but also on education, increasing knowledge and awareness of target groups. The results of the project will be promoted among educational institutions and will encourage them to use the developed educational solutions for refugee women</p> <p style="text-align: right;">710 / 1,000 characters</p>
<p>Small and medium enterprise</p>	<p>The project will collaborate with many sectors to test the pilot services in a real environment, especially sectors that include providing special programmes for migrants. This target group is reached throughout the Baltic area, especially in Sweden, Latvia, Denmark, Estonia and Norway and Poland. SMEs will be engaged in Stakeholders groups and the ecosystem of supporting women refugees</p> <p style="text-align: right;">389 / 500 characters</p>	<p>SME's are one of the main target group as they set the tone of the business environment in the Baltics. Advanced skills support companies to reach out transnationally and globally and share the good practices of the Baltics. Companies are able to develop their activities in remote environments, and in broad perspective, to function in fast evolving and uncertain times. The target group will be involved in diagnosis level, stakeholders groups, taking part in the pilots', providing feedback and taking part in the hub activities. They share their experiences of the current situation and needs. In the transferring phase, they will share their experiences in the project internally and to other companies. The target group is involved in all phases of the project. A very important element will be their involvement in the process of development and learning of start-ups. Also in the process of networking, creating a Fund or searching for investors.</p> <p style="text-align: right;">954 / 1,000 characters</p>

Target group	Sector and geographical coverage	Its role and needs
<p>Regional public authority</p>	<p>The key role of regional public authorities is to influence strategic decision making, so it considers remote work environments as a part of the area's appeal. Other sectors are local service development, entrepreneurship, learning and infrastructure. All partners will collaborate with regional public authorities.</p> <p>Consultation of the developed solutions; analysis of the co-financing possibilities of proposed activities, as a part of available regional programs</p> <p style="text-align: right;"><small>464 / 500 characters</small></p>	<p>Regional public authorities will support the project by providing a strategic viewpoint on the development of work life in the local areas of Baltics in all phases of the project. Consultation of the developed solutions; analysis of the co-financing possibilities of proposed activities, as a part of available local/regional programs / systems. Public authorities will also collaborate with other areas to share the results of the project. Integration of public services according to citizens' needs is a key to local public service development. Regional public authorities will act as strategic partners in the project and provide strategic view for project's work. They are also in a key position when it comes to the Quadruple Helix-model as a partner that naturally unites all the 4 parts, business, government, universities and civil society. Authorities' representatives will participate in regional and transnational workshops on supporting entrepreneurship of refugee women</p> <p style="text-align: right;"><small>983 / 1,000 characters</small></p>

3.4 Project objective

Your project objective should contribute to:

Resilient economies and communities

The objective is to disseminate the developed solutions in the Baltic Sea area and ensure the sustainability of the project results through the creation of the Transnational Fund and promotion and recommendations in the field of support instruments for companies establishing by refugee women. The project also aims to counteract the negative economic and social effects of the BBSR business sector caused by the aftermaths of the invasion on Ukraine or other wars in different places in the world:

- improving refugee women entrepreneurial skills that will result in their economic independence, self-employment, self-realization and potential,
- creation of an incubation program of innovative business set-up
- providing project participants with a micro fund for starting a business,
- increasing the competitiveness of the Baltic Sea Regions companies,
- dissemination of the developed solutions.

The project will be a sustainable solution to counter refugee crises and increase the resilience of regions. Thanks to the prepared solution, the BSR regions will have an incubation program and a Transnational Fund supporting women refugees.

EU Strategy for the Baltic Sea Region - one of the main objectives of EUSBSR is to enhance the region's prosperity, improving business opportunities and make the internal market work better.

The project fits perfectly into the implementation of this strategy, creating innovative and comprehensive solutions to enrich innovation, the labor market and employment of female refugees, ensures constant cooperation of the Baltic countries in this area.

1,599 / 2,000 characters

3.5 Project's contribution to the EU Strategy for the Baltic Sea Region

Please indicate whether your project contributes to the implementation of the Action Plan of the EU Strategy for the Baltic Sea Region (EUSBSR).

Yes No

Please select which Policy Area of the EUSBSR your project contributes to most.

PA Innovation

Please list the action of this Policy Area that your project contributes to and explain how.

The project is fully in line with the Policy Area 'Innovation' and its aim: promoting global competitiveness and growth of the Baltic Sea region through support for entrepreneurship, business development, science and increased innovation capacity.

The project will try to use the full potential of the Baltic Sea region in the fields of research and innovation, as well as by attracting talents who are female refugees from war zones. Due to the war in Ukraine, many countries belonging to the BSR will receive increased waves of war refugees and the project will try to find sustainable solutions to support these people and their innovative ideas. Thus, it will contribute to the development of BSR, innovation, building an ecosystem based on smart specialization and sustainable growth.

Challenge-driven innovation: Challenges and opportunities related to the creation of friendly economic environment for viable or innovative start-ups set up by refugee women. The set-up micro-capital seed fund will boost business activity and competitive transnational economic relations. The actions in developing start-ups by refugees from Ukraine will reduce and negative economic effects caused by the wave of refugees from Ukraine in the BS Regions. Giving business opportunities the project also tackles the challenge of vulnerable groups integration.

1,349 / 1,500 characters

If applicable, please describe which other Policy Areas of the EUSBSR your project contributes to and how.

The project is fully in line with the Policy Area Education (PA EDU), which contributes to strengthening the social dimension of the EU Strategy for the Baltic Sea Region (BSR). The Policy Area covers four areas: education, science, employability and integration of migrants.

Project like PA EDU contributes to an increased prosperity that presupposes access to quality education and training, an effective and inclusive welfare system and a well-functioning labor market supporting geographical, professional and socio-economic mobility.

Strengthening the social dimension of BSR Encouraging entrepreneurship will not only counteract unemployment, increase employability and professional activation but also prevent a number of social issues and emigration-related challenges such as quality of life or mental wellbeing of refugee women. Providing training in the field of business management will increase qualifications. Supporting integration of migrants, their education and employability will contribute to an effective and inclusive welfare system and a well-functioning labour market of the BSR countries.

3.6 Other political and strategic background of the project

Strategic documents

Project supports European Industrial Strategy: Small and medium-sized enterprises, which are the main driver of innovation in various ecosystems, are at the center of all actions in the strategy. The new actions will bring significant benefits to SMEs and start-ups, whether by strengthening the single market, reducing dependence on supply or accelerating the ecological and digital transformation. Strategy emphasizes innovation, competitiveness goals by creating more innovative region and jobs

500 / 500 characters

A Union of Equality: Gender Equality Strategy 2020-2025 - The strategy sets out the policy goals and actions to make substantial progress towards gender equality in Europe by 2025. The project strongly contributes to all the strategy goals having in the center of project actions women from vulnerable group (refugees) creating a space for them, giving a chance on the labor market and a chance to become part of the BSR societies based on the principle of equal opportunities.

478 / 500 characters

As part of the European Green Deal, the Climate Pact offers a space to be part of an European climate movement. Friendly economic environment (eco-system) for woman entrepreneurs and innovators originating in Ukraine and others nations in a similar situation supports the Climate Pact as they provide a space to share information, debate and act on the climate crisis. Project's aim is to transform the area into a resource-efficient and competitive economy, place where no person or place is left behind

4.1 Project management

Please confirm that the lead partner and all project partners will comply with the rules for the project management as described in the Programme Manual.

If relevant, please indicate any other important aspects of the project management, e.g. external entity supporting the lead partner in the management of the project, advisory board, steering committee, any other relevant working groups, etc.

Project management will be carried out by LP based on its experience and qualified staff, with the support of the Steering Committee (SC) composed with representatives of each project partner. SC will be created in line with the Programme Manual provisions to ensure that all partnership members have necessary decision making power and to monitor the quality of the project's implementation on local, national and programme level. SC members will meet on regular basis at least once every 6 months.

499 / 500 characters

4.2 Project financial management

Please confirm that the lead partner and all project partners will comply with the rules for the financial management and control as described in the Programme Manual.

If relevant, please indicate any other important aspects of the financial management, e.g. external entity supporting the lead partner, positions planned for financial management, involvement of special financial experts (e.g. for public procurement), etc.

Every day project implementation will be provided by the Project Management Team (PMT) appointed on local level by each project partner, composed of at least Project, Communication and Financial managers. Moreover, at the central level, the PMT appointed by the LP (highly-skilled internal experts) will ensure the proper coordination of activities and support for the entire partnership in all matters related to financial management, reporting and public procurement procedures.

481 / 500 characters

4.3 Input to Programme communication

Please confirm that you are aware of the obligatory inputs to Programme communication that must be submitted along the pre-defined progress reports, as described in the Programme Manual.

If relevant, please describe other important aspects of project communication that you plan to introduce, e.g. a communication plan, opening and closing events, social media channel(s) etc.

The communication goals, activities, audience and expected outputs will be defined in the Communication Plan prepared within first 3 months of project. LP will coordinate the communication activities and all PPs will support this process by operating on their local and national level. Project Facebook, Instagram and LinkedIn channels, as well and digital platform, planned Kick-off event and final conference will support the communication process (events will be linked to other project meetings).

500 / 500 characters

4.4 Cooperation criteria

Please select the cooperation criteria that apply to your project. In your project you need to apply at least three cooperation criteria. Joint development and joint implementation are the obligatory ones you need to fulfill in your project.

Cooperation criteria

Joint Development

Joint Implementation

Joint Staffing

Joint Financing

Outputs and deliverables overview

Code	Title	Description	Contribution to the output	Output/ deliverable contains an investment

D 1.1	Diagnosis of local needs with joint transnational approach and recommendations	The deliverable will have three parts: 1. Joint common transnational approach to the project and the individual phases of implementation - Joint capacity building of partners and joint model development - Workshops partners on project approach. Establishment of a common methodology as the basis for joint definition of activities and products by all partners. P3 will organize the transnational meeting; all PPs participate. 2. Joint study and methodology for the work of regional stakeholder working groups - Joint study on key sectors in Baltic Sea Area and their relationship to smart specializations of participating regions and their relationship to start-up supporting ecosystem. It will include methodology and an organizational chart for the work of regional stakeholder working groups. The report will be used to tailor the overall approach towards the target group 3. Diagnosis of local needs and potentials of individual partner regions together with recommendations for further work on the model of refugee start-up women supporting system.	RCO 87 - Organisations cooperating across borders	
D 1.2	Set of tools for refugees	A toolkit to help refugee women adapt to new life in the foreign country and familiarize them with the legal aspects of entrepreneurship, the support system for entrepreneurs and start-ups, cultural aspects, etc., including a guide, webinars, podcasts, videos, graphics, online tools. The toolkit will allow refugees to learn about the specifics of the Baltic Sea countries and will enable them to obtain support in setting up companies and developing business ideas by refugees, including pre-female refugees. The created tools will be very diverse and intuitive. Pictorial and graphic messages, simple wording, and adaptation to recipients will be used. Both written content, drawings, photos, videos, etc. will be created.	RCO 116 Jointly developed solutions	
D 1.3	Refugee incubation program	The incubation program will be jointly consulted as part of the Transnational learning workshop - organization of joint transnational learning workshop to develop a common approach to the incubation program for refugee women. It is planned that the workshop in P5 and will last 3 days, including brainstorming sessions, planning and open discussions. Final remarks, conclusions will be included in the incubation programme. It will take into account regional smart specializations of individual partner regions. The program will contain a detailed description of the incubation program tailored to refugee women, their needs and challenges, but will also take into account the specificity of partner regions and smart specializations of the regions. Creation of an incubation program will consist of: a) start-up idea scouting - a set of professional tools and activities to ensure the smooth recruitment and participation of women with relevant business ideas . Support during incubation will include cultural differences training, integration, knowledge of entrepreneurship based on the tools created in action 2. b) soft-landing-activities aiming at providing the business idea owners with the necessary conditions for starting the right business activity in a particular country. c) business development - individualized activities and support to start the business activities d) incubation - intensive work on the idea's development, diagnosis of start-up and market needs, creation of individual incubation plans, experts support e) financial support (capital investments) dedicated to the best ideas selected as part of an international event (demo day) and recommended by individual partners f) post-incubation The aim of the incubation program will be to identify, cultural and linguistic support and transform the business idea of refugee women into a product or service adapted to market conditions and to create a repeatable, scalable and profitable business model to enter the market	RCO 116 Jointly developed solutions	
D 1.4	The joint concept of a common, transnational, democratically managed Fund for Women Refugees	The deliverable will consist of three parts: a) Report of all partners' meetings concerning the development of the concept of a transnational fund" – a report establishing cooperation among all members of the Network acceptance of rights and obligations by all members. b) The joint concept of a common, transnational, democratically managed Fund for Women Refugees - participation in the creation and management of the franchise fund gives real influence to all participants in the franchise system on how it operates, manages, collects and disburses funds. P2 will organize the transnational meeting; all PPs participate." c)Fund for Women Refugees financial feasibility study - study on how to raise and spend the fund - the fund will be able to be financed from established start-ups, e.g. shares in start-ups, but also possibly from a percentage of revenues, or from additional other sources of financing (e.g. grants, donations, loans, private investors, etc.). Details developed during project implementation.	RCO 116 Jointly developed solutions	
D 2.1	Joint report on the Digital platform establishment	Document on the process of digital platform establishment, activities and selection methodology. PP1 will lead the process with constant involvement and inputs from all PPs since it will be used internationally. Containing packages of ready-made solutions, including an operating manual, a set of tools, quality systems, technical knowledge, training materials, videos, webinars, etc. The created platform will be: intuitive and user-friendly, transparent management panel, appropriate server and technical support, adaptation to people with disabilities, etc. The platform will provide access from any device, regardless of technology and operating system. Thanks to this, it will be possible to use the materials by users via laptops, computers, tablets and smartphones.	RCO 116 – Jointly developed solutions	

D 2.2	A toolkit with standardized templates for pilot actions	The deliverable will consist of three parts: a) A toolkit with standardized templates for pilot actions - A toolkit with standardized templates for implementation, and evaluation reports, including per review. Standardization of implementation and evaluation tools will allow for an objective assessment of the economic and social effectiveness of the creative models. P6 will organize the transnational meeting. b) Roadmap for joint implementation of the pilots with methodology for implementation and evaluation - the tool will support the implementation of incubation program according to a uniform standard and will also describe a 3-step process: evaluation of pilot activities; peer review of PA by transnational partners; a final overall assessment that will include recommendations for the main projects' stakeholders. c) Methodology for joint implementation and evaluation of pilot actions - a detailed description of the pilot implementation developed model. Will include: timing, resources, description, risk mitigation plan, methodology etc	RCO 84 – Pilot actions developed jointly and implemented in projects	
D 2.3	Toolkit (recruitment forms, regulations, evaluation cards, interview cards, tests, criteria etc.)	The deliverable will consist of Toolkit (recruitment forms, regulations, evaluation cards, interview cards, tests, criteria etc.) for the identification and recruitment of refugee women who will be included in the developed transnational incubation program in line with regional smart specializations. And also reports on the selection of female refugees for Action Plan - reports from each region- description of selection made on the basis of previously prepared documents, regulations and criteria. The report will contain a summary of the recruitment of a female refugees - each partner region. The created toolkit will allow the recruitment of participants to the incubation program in the future and can be used in other projects aimed at refugees or immigrants. It will take into account the specificity of the target group, including cultural and linguistic differences	RCO 84 – Pilot actions developed jointly and implemented in projects	
D 2.4	Toolkit, support programs, tested tools and solutions to support female refugees	A set of tools, materials, and ready-made solutions to run an incubation program for refugee women after the completion of the pilot action. The toolkit will include video materials, interviews, podcasts, webinars, templates, tools to effectively support refugee women in developing innovative ideas and establishing a start-up. Development of training videos / webinars on the implementation of the developed and tested incubation program created at the stage of implementation of pilot actions, showing the practical elements of program implementation, incl. interviews with the staff involved in the implementation.	RCO 84 – Pilot actions developed jointly and implemented in projects	
D 2.5	Pilot Action Reports including joint report BSR Demo Day event	Pilot Action Reports including joint report BSR Demo Day event - it will contain a description of the effects of testing hypotheses developed models, as well as conclusions from the implementation, as well as guidelines and recommendations for the final version of incubation program. Each pilot develops a visualization presentation kit elements of its action (e.g. photos, videos). It will contain: 1. Ongoing monitoring of activities by verifying compliance with the assumptions, cost analysis, collecting comments on the implementation enabling taking preventive measures. 2. Joint peer review based on a common methodology. 3. Qualitative evaluation, measuring the impact of the solution on, inter alia, the target group, the situation of these people, the increase in the quality of life of refugee women, social change and the functioning of the local community, as well as the results of peer review and reports on pilot actions constituting the basis for creating recommendations for the final version of the incubation program. 4. Based on the results of AP, a comprehensive set of tools for the implementation of the developed and tested models, including Operational Manual, Candidate Assessment Tool, Support Concepts, Webinars and Training, Quality System, Technical Knowledge, Marketing Package, etc. which will be available on the platform. 5. Joint report Demo Days event - Joint report will summarise the results of previous activities and actions including BSR Demo Day for showcasing and pitching ideas and will measure the impact on the target group.	RCO 84 – Pilot actions developed jointly and implemented in projects	
D 3.1	Report on the creation of a transnational BSR fund for the support of refugee women	Report on the establishment of the Steering Committee and the approval of all developed documents related to the establishment of a fund to support women refugees. They arose after a transnational meeting of all partners organized by P7. Membership in the Fund will also allow to implement joint projects and benefit from the knowledge and experience of other Fund participants. As part of this deliverable will be developed a joint operational plan for the next 3 years after project completion - plan how the Fund will be act in the future with the resource use policy as part of the Fund. How the fund will support future projects, how will it manage the resources, how often will meetings be held, etc.	RCO 87 Organisations cooperating	
D 3.2	Recommendations for creating refugees support instruments for public authorities	Recommendations for creating refugees support instruments for public authorities - the developed solutions will be an inspiration for entities that are thinking about creating instruments to support refugees. Aimed at public and private authorities. They will consist of Recommendations on legal regulations, both national and EU - regulatory recommendations, both national and EU initiatives to support the entrepreneurship of refugee women and the creation of start-up support systems and also a set of materials related to the national workshops - a set of materials, program, tools for domestic workshops for regional authorities and decision makers on the development of instruments to support entrepreneurship of refugee women and on national legislation on the subject. It will be organized 1 workshop per partner region and also 1 transnational event (final conference organized by P4) in order to inform about the developed project results, about the created fund and its further durability	O.3.2 Final recommendation report for local/ regional public authorities	

Work package 1

5.1 WP1 Preparing solutions

5.2 Aim of the work package

The aim of this work package is to prepare solutions to help address the identified challenge. You can either develop entirely new solutions or adapt existing solutions to the needs of your target groups. Prepare your solutions in a way that you can pilot them in Work Package 2. Consider how you involve your target groups in preparation of the solutions. Organise your activities in up to five groups of activities to present the actions you plan to implement. Describe the deliverables and outputs as well as present the timeline.

5.3 Work package leader

Work package leader 1 PP 1 - Rzeszow Regional Development Agency

Work package leader 2 PP 7 - Dalarna Science Park

5.4 Work package budget

Work package budget 20%

5.5 Target groups

	Target group	How do you plan to reach out to and engage the target group?
1	<p>Interest group</p> <p>Refugee women from areas affected by military activities (mostly Ukraine, Syria). Female refugees who came to partner countries. All EU members and their economies will benefit from professional activation of vulnerable groups of refugees but what is the most relevant, war immigrants will be supported with professional, long term business oriented help.</p> <p>355 / 500 characters</p>	<p>Target group - women refugees will be involved in all activities under this WP. Their representatives will be invited to the Regional Stakeholder Group, they will participate in diagnostic activities, where their needs, barriers and opportunities will be identified. The developed tools will be consulted with them. Both in the field of disseminating knowledge about entrepreneurship in the BSR countries, but also the program of incubating women refugees, forms of support and the concept of the fund. Many years of experience of partners, project promotion, social media, databases, cooperation with employment offices will be used to engage them in the project.</p> <p>664 / 1,000 characters</p>
2	<p>Business support organisation</p> <p>BSO from partnership regions - Poland, Norway, Denmark, Estonia, Lithuania, Latvia, Sweden. The sectors of business support are business development, digitalization, recruitment, work environment and internationalization. The partners are business support organizations from Sweden, Latvia, Denmark, Estonia and Norway and Poland, but all partners will collaborate with local business support organizations. Project partners will also work with BSOs from other BSR countries</p> <p>474 / 500 characters</p>	<p>Business support organizations and business incubators are engaged in the project activities from the beginning by partners reaching out and creating a group of organizations who share expertise and interest in remote activities. The consortium includes business support organizations which provide the project with a good understanding and network of such target groups. The target group is an important link in reaching a wide spectrum of micro companies and SME's. The organizations are engaged in creation incubation program, transnational fund, pilots, dissemination. In addition, BSO will be involved in diagnostic activities, meetings of stakeholder groups, consultations on incubation programs, consultations on the concept of the fund. The partners' experience from many years of cooperation with them will be used, including databases or cooperation agreements</p> <p>870 / 1,000 characters</p>
3	<p>Education/training centre and school</p> <p>The project focuses on the creation of friendly economic environment (eco-system) for woman entrepreneurs and innovators originating in Ukraine and others nations in a similar situation, focused on establishing a financial instrument. Organizations with best practices and data co-creation methods and living lab models in an international environment. The partners will engage education /training centre and school and collaborate with them to promote education among refugees.</p> <p>477 / 500 characters</p>	<p>They were involved in the project up to the diagnostic stage, creating regional stakeholder groups as representatives of the education sector, creating promotion tools, education and disseminating knowledge about entrepreneurship and establishing companies in the BSR. They will also be involved in the process of creating the incubation program, especially in the education part. The concept of the fund will also be consulted with them and the support that may be offered within it. The partners will cooperate with them on the basis of taking advantage of many years of presence on the market and the willingness to seek common solutions to help refugees.</p> <p>658 / 1,000 characters</p>

	Target group	How do you plan to reach out to and engage the target group?
4	<p>Small and medium enterprise</p> <p>The project will collaborate with many sectors to test the pilot services in a real environment, especially sectors that include providing special programmes for migrants. This target group is reached throughout the Baltic area, especially in Sweden, Latvia, Denmark, Estonia and Norway and Poland. SMEs will be engage in Stakeholders groups and the ecosystem of supporting women refugees</p> <p style="text-align: right;">389 / 500 characters</p>	<p>They were involved in the project up to the diagnostic stage, creating regional stakeholder groups as representatives of the entrepreneurship sector, creating promotion tools, education and disseminating knowledge about entrepreneurship and establishing companies in the BSR. They will also be involved in the process of creating the incubation program, especially in the advisory and financial support part. The concept of the fund will also be consulted with them and the support that may be offered within it. Involving them in the project thanks to many years of cooperation, the help of SMEs partners, granting them grants, loans, consulting, training, and the willingness to look for common solutions to help refugees.</p> <p style="text-align: right;">724 / 1,000 characters</p>
5	<p>Regional public authority</p> <p>The key role of regional public authorities is to influence strategic decision making, so it considers remote work environments as a part of the area's appeal. Other sectors are local service development, entrepreneurship, learning and infrastructure. All partners will collaborate with regional public authorities. Consultation of the developed solutions; analysis of the co-financing possibilities of proposed activities, as a part of available regional programs</p> <p style="text-align: right;">464 / 500 characters</p>	<p>They were involved in the project up to the diagnostic stage, creating regional stakeholder groups as representatives of public authorities, creating tools for promotion, education and disseminating knowledge about entrepreneurship and establishing companies in the BSR. They will also be involved in the process of setting up the incubation program, especially the political part. The concept of the fund will also be consulted with them and the support that may be offered within it. Involving them in the project thanks to many years of cooperation on various types of programs and projects, as well as the willingness to seek common solutions to help refugees.</p> <p style="text-align: right;">664 / 1,000 characters</p>

5.6 Activities, deliverables, outputs and timeline

No.	Name
1.1	Creation of regional / local stakeholders network in each project partner region
1.2	Create an entrepreneurial toolkit for refugees
1.3	Creation of an incubation program
1.4	Preparation a transnational investment fund concept

WP 1 Group of activities 1.1

5.6.1 Group of activities leader

Group of activities leader PP 1 - Rzeszow Regional Development Agency

A 1.1

5.6.2 Title of the group of activities

Creation of regional / local stakeholders network in each project partner region

81 / 100 characters

5.6.3 Description of the group of activities

Engagement of local societies and stakeholders is crucial for the solutions development. Developing the formula of participatory management activities (with active participation of community, enterprises, public administ., non-governmental organizations, research units) will help to create a solid workplan and report on needs and potential of each partner regions (in accordance with smart specializations). Working groups of regional stakeholders will be organized and will integrate: enterprises, public administration, non-governmental organizations, research units, refugee women groups (1 meeting/month for diagnostic purposes in the first months of the project and less frequently – 1 meeting/3 months to consult on the effects of the project implementation). The main task is the collection and processing of the best practices for start-ups creation and benchmarking of available incubation and acceleration programs for start-ups. This will aim at transfer of know-how cooperation in the field of support tools creation. Country-specific mapping of best innovation methods, identification of cooperation opportunities and knowledge transfer will tailor the overall approach to creativity, innovation and adapt it to the needs, target group and stakeholders. Another task is collecting info on the target group, in particular their creative potential, ecosystem, goals and motivations (a professional survey will examine the needs of refugees in terms of the necessary creative skills and tools for entrepreneurial activities, helping to identify barriers and their needs with risk-taking, innovative ideas and predispositions to start own business. Diagnosis of local needs and potentials of individual partner regions, with the active participation of community members and refugee representatives, allow to identify the specialization of individual partner regions and concentration with the support of refugees in the indicated industries and specializations. The ecosystem will be created in order to constantly support refugees who have innovative business ideas, including projects / inventions that reduce the impact on the natural environment (to implement eco-friendly solutions). Ecosystem members will help disseminate info about the Project and promote the best business ideas. The ecosystem will be successively expanded with new entities having a significant impact on supporting innovation. Clusters will provide expert support in the area of the industries they represent. The role of the governments will be to support the Project's intensive promotional campaign. The universities will enable the promotion of the Project among the academic community, and will provide substantive support at the stage of specifying the project / idea to ensure its usefulness and innovation. It will create an additional opportunity to accelerate the economic use of intellectual potential, increase the scale and effectiveness of commercialization of ideas and research results.

5.6.4 This group of activities leads to the development of a deliverable

D 1.1

Title of the deliverable

Diagnosis of local needs with joint transnational approach and recommendations

78 / 100 characters

Description of the deliverable

The deliverable will have three parts:

1. Joint common transnational approach to the project and the individual phases of implementation - Joint capacity building of partners and joint model development - Workshops partners on project approach. Establishment of a common methodology as the basis for joint definition of activities and products by all partners. P3 will organize the transnational meeting; all PPs participate.
2. Joint study and methodology for the work of regional stakeholder working groups - Joint study on key sectors in Baltic Sea Area and their relationship to smart specializations of participating regions and their relationship to start-up supporting ecosystem. It will include methodology and an organizational chart for the work of regional stakeholder working groups. The report will be used to tailor the overall approach towards the target group
3. Diagnosis of local needs and potentials of individual partner regions together with recommendations for further work on the model of refugee start-up women supporting system.

5.6.3 Description of the group of activities

As part of the task, the partners will jointly develop a guide with a set of educational and promotional tools for women refugees from setting up and running a business in the partner countries of the project with the answers on following basic and the most important questions:

- What kind of business activity is possible in the particular country? description of the forms of business activity and types of the companies
- What are the pros and cons of each of the legal form of business activity? • What kind of abilities and qualifications are necessary to perform various professions?
- Requirements for foreigners/refugees on opening business, labor law and business conducting law in the partner countries: information on what documentation is necessary to register a company
- Information on taxes and tax law
- What insurance is available and obligatory to conduct business activity?
- Is it possible to temporarily transfer / perform services from one to another country(cross-border activity), what are rights and obligations to fulfill in such case?
- Where to look for support in setting up a business or developing an idea?
- Tools (instruments) for supporting entrepreneurship that are available to refugees: legal and administrative instruments, infrastructure instruments, soft support instruments and financial instruments.
- Regional and national smart specializations in partner countries
- Partner Regions :Information on the required permits to start business • Ways of raising/getting capital/ funds support for starting a business and description of the rules related to obtaining financial support
- Social programmers/ facilities that could be used by, for example, single mothers, caregivers

The guide will also be enriched with graphics, videos, podcasts, and webinars to educate and promote entrepreneurship among refugee women and will be available on the platform created in the frame of the project.

5.6.3 Description of the group of activities

Following the conclusions, findings and results of the analyzes and mapping carried out in the previous steps / activities, partners will organize a joint workshop to develop a common transnational approach and solutions to support refugee women, taking into account the need for innovation, enhancing creativity and sustainable development in the Baltica Sea Area.

Regional differences will be taken into account and a female refugee incubation program will be developed jointly by all partners and will define key objectives and interventions to establish a transnational implementation framework. 3 days workshops includes summary and findings session, brainstorming session, open discussions on further planned activities. Final remarks, conclusions will be included in the incubation programme. It will take into account regional smart specializations of individual partner regions and redirect ideas matching different specializations to individual partners.

Creation of an incubation program will consist of:

- start-up idea scouting - a set of professional tools and activities to ensure the smooth recruitment and participation of women with relevant business ideas . Support during incubation will include cultural differences training, integration, knowledge of entrepreneurship based on the tools created in action 2.
- soft-landing – activities aiming at providing the business idea owners with the necessary conditions for starting the right business activity in a particular country.
- business development - individualized activities and support to start the business activities.
- incubation - intensive work on the idea's development, diagnosis of start-up and market needs, creation of individual incubation plans, experts support. Idea owners got mentor support – they will receive the support of a translator, lawyer or startup supervisor, take part in workshops or training sessions.
- financial support (for example capital investments) dedicated to the best ideas selected as part of an international event (demo day) and recommended by individual partners.
- post-incubation - activities aimed at maximizing the results achieved by chosen startups and their incubation results, cooperation with the company or VC, cooperation with the recipient of technology or VC fund, participate in job shadowing etc. As part of post-incubation process, the partners will verify and monitor the activities of new start-ups.

The project develops a supportive environment in each partner regions, kind of “open door” activities and support for female refugees so they can have complex entrepreneurship supporting programme. The incubation program will support the adaptation of refugee women to the culture and legal regulations in the new country, including psychological, linguistic and cultural support, depending on the needs.

Description of the deliverable

The incubation program will be jointly consulted as part of the Transnational learning workshop - organization of joint transnational learning workshop to develop a common approach to the incubation program for refugee women. It is planned that the workshop in P5 and will last 3 days, including brainstorming sessions, planning and open discussions. Final remarks, conclusions will be included in the incubation programme. It will take into account regional smart specializations of individual partner regions. The program will contain a detailed description of the incubation program tailored to refugee women, their needs and challenges, but will also take into account the specificity of partner regions and smart specializations of the regions. Creation of an incubation program will consist of:

- start-up idea scouting - a set of professional tools and activities to ensure the smooth recruitment and participation of women with relevant business ideas . Support during incubation will include cultural differences training, integration, knowledge of entrepreneurship based on the tools created in action 2.
- soft-landing–activities aiming at providing the business idea owners with the necessary conditions for starting the right business activity in a particular country.
- business development - individualized activities and support to start the business activities
- incubation - intensive work on the idea's development, diagnosis of start-up and market needs, creation of individual incubation plans, experts support
- financial support (capital investments) dedicated to the best ideas selected as part of an international event (demo day) and recommended by individual partners
- post-incubation

The aim of the incubation program will be to identify, cultural and linguistic support and transform the business idea of refugee women into a product or service adapted to market conditions and to create a repeatable, scalable and profitable business model to enter the market

Preparation a transnational investment fund concept

51 / 100 characters

5.6.3 Description of the group of activities

Rules for the creation of a transnational investment fund supporting women refugees in the Baltic Sea will be prepared, as well as the internal organization of its operation, status, legal aspects and the location of the fund and a decision-making model focused on investing in start-ups by entrepreneurs and innovators. As part of the task, the concept of a joint, transnational, democratically managed fund will be developed, which will be at the disposal of all participants in order to strengthen the entire system of support for women refugees. This task consists of the following activities:

1. Project Partners meeting on the concept of a joint transnational, democratically managed Investment Fund and development of its operation, structure of decision-making bodies, scope of tasks and responsibilities, frequency of further meetings, etc. system framework and its development.
2. Development of fund management mechanisms - The Project Steering Committee will adopt rules for the international fund. Its concept will be developed; joint decision making and management of this fund and types of tools for its optimal operation. The fund will be democratically managed and will be at the disposal of all participants of the system.
3. Development of a method and rules for receiving and spending funds. All possible solutions and the developed mechanisms of funds acquisition will be used not for the Fund's profit, but for its development and expansion of the offer. Project partners are more interested in the enlargement of the network, its impact on the development of start-ups among refugees (including the use of their potential), partners and the system than on the income obtained from its operation. Building the financing system will be of key importance for the sustainability and effectiveness of the system in the future. Therefore testing capital investments is necessary, which in the case of the success of the supported start-up and, for example, the purchase of shares by the business idea owner or the sale of shares to an external investor, enables the fund to obtain funds for the investment in further projects.

5.6.2 Title of the group of activities

Establishment of digital platform for Women Refugees

54 / 100 characters

5.6.3 Description of the group of activities

The digital platform will be used in several phases of project: recruitment, connecting the target group with mentors, , entrepreneurs and investors, and for support, mentoring and matchmaking by creating multidisciplinary, international teams and adapted technologies. It will also be used to exchange information and encourage the integration of the transnational value chain.

During the cooperation between Mentors Originators with originators ,business ideas owners , experts, investors and project team , an internet platform for the project will be used.

The Originator Support Platform will support and high quality of services for the Originators. This digital tool will include online information and tips, communication and online meetings with Supervisors, advisors, experts, arranging meetings, informing about events, tracking the individual support program and achievement of milestones, and specific actions to support of an innovator in the transformation of ideas with high commercialization potential towards ready-made products, services, technologies. The digital tool will allow overcoming the limited resources of tutors and advisors working with Originators, as well as the distance barriers between the participant and the support system. The goal is to make the time spent caring for and advising the Originator more effective.

Activities: development of the Innovation Hub concept, selection of a digital platform tailored to the needs of the target group, launch and maintenance of a social media (FB, LinkedIn).

We will use methods to reach the audience digitally and determine the most appropriate approach in this channel. It will include a range of online activities and physical engagement that will interest refugee women. The platforms will contain the materials developed to support the project implementation. It will also be a space for effective cooperation between partners, investors and participants, and to support institutions working to support the system for women refugees. All tools developed in the project, including a package of ready-made solutions (operational solutions), a manual, packages, results of pilot actions, materials from training sessions or study visits, videos, interviews will be recorded and then used to create webinars posted on the platform, training, podcasting etc.

The fund created and its future activities will be based on the platform created, which will contain all information on future incubation programs for refugees. The use of the platform in the process of provided support will facilitate and speed up communication between cooperating parties, allowing, inter alia, for better planning, supervision over the implementation and summary of the program of providing support services for Originators, and efficient flow of documentation related to the support provided in the project. This tool will be modeled on the Norwegian solutions provided by the project partner - Møre and Romsdal County Council.

A. Shaping joint pilot activities - Methodology for joint implementation and evaluation

1. The cogeneration process at the regional level, involving both institutions supporting start-ups, public administration, non-governmental organizations, as well as representatives of start-ups and refugees in order to define challenges, bottlenecks and proposal of specific actions to overcome them (workshops). The result will determine the type of activities necessary for the effective implementation of the incubation program (input to the AP Toolkit).
2. To ensure coordinated cooperation, operational implementation milestones will be regulated uniformly in the Action Plan. A common goal of the pilots will be defined, including social goals.
3. A toolkit with standardized templates for implementation and evaluation reports will be developed.
4. Development of an AP that will include: short, medium and long term steps to test the developed transnational program of incubation of refugee women in line with smart specializations of the regions, raising stakeholder knowledge, enhancing socio-economic cooperation and efficiency.

5.6.3 Description of the group of activities

Preliminary activities related to pilot actions - start-up idea scouting:

1. Announcement of recruitment for refugee women to the incubation program by individual regions on the basis of specific recruitment criteria with the use of tool patterns developed in the project, e.g. in the form of Challenges in the thematic areas specified under Regional Smart Specializations, which respond to current and important socio-economic problems. The projects submitted by the originators will be assessed, and the best solutions in a given area will be given a chance to participate in the incubation program.

2. Originators will apply through the website created for the Program (online platform). The originator will fill out a form in which he will describe his business idea and justify its innovative nature.

3. Assessment. There are two stages to the assessment:

- Preliminary by the Qualification Committee (project team),

The preliminary assessment will be subject to, inter alia, the following criteria:

a) a natural person, a refugee woman

b) innovation - required innovation, understood, inter alia, in as the placing on the market of products or services that are new or significantly improved in terms of their characteristics or uses,

c) having business potential and appropriate competences of the originator,

This stage is aimed at eliminating ideas that do not bear the hallmarks of any innovation and those that do not show a market potential.

- The final one, made by the Expert Panel, consisting of two parts:

a) in-depth evaluation of innovation - based on the application form.

b) face-to-face presentation to the Expert Panel (members of the expert network from among the project's stakeholders) which will make the final selection of ideas.

The main criteria for the evaluation of the idea by the Expert Panel include:

a) innovation and originality of the idea in relation to the solutions available on the market,

b) the Originator's experience and qualifications,

c) the market potential of the idea,

d) the economic viability of the commercialization of the investment,

e) subscribing to Regional Smart Specializations

The created toolkit will allow the recruitment of participants to the incubation program in the future and can be used in other projects aimed at refugees or immigrants. It will take into account the specificity of the target group, including cultural and linguistic differences

Pilot implementation of the incubation program for refugee women

64 / 100 characters

5.6.3 Description of the group of activities

1. The pilot implementation as a test check of the developed transnational incubation program for refugee women. Signing an agreement for the provision of support services for the target group - the support will last on average 4 months (from 3 to 6 months). The Panel of Experts together with the Originators Mentor will decide on the length of the provision of support and care services. It will be possible to extend its period in exceptional circumstances. The Originator will be looked after throughout the entire duration of the program. Possible constant contact with employees: by phone, via internet tools (created platform) and / or in person in the form of an individual meeting. Supervisors, in consultation with the originators and industry Experts, for the Originators accepted for incubation, will be required to prepare Recommendations on the subject and type of specialist services that will enable the creation of the MVP and its introduction to the market. Originators, thanks to the involved stakeholders in the given regions, will have a place where their ideas can go through the next stages of development in one, specially prepared environment. This environment will be organized in such a way as to respond to the individual needs of originators working on the development of their concepts. The tasks of the Originator Mentor are: help in adapting to a new country, preparing a support service provision program and supervising its proper implementation, working together on the development of a business model, determining the type of services necessary for the originator, systematically assessing the progress of work, creating a business model and MVP, preparation of the final report on the provision of specialized support services. Mentors will use the Lean startup, Customer Development, and Design Thinking methodology. Implementation of basic and specialist services - each Originator will be able to use a package of basic and specialist services. The scope and type of these services will be determined by the Mentor together with the Originator. The project provides for basic services, including: access to the technological infrastructure of the innovation ecosystem and the necessary equipment (e.g. laboratories or prototyping rooms), providing office space, the possibility of using a computer, the Internet, business and financial consulting, legal services, basic technological consulting, preparation of presentations for pitching sessions, marketing support. The number of hours will be flexible and will depend on the needs reported by the Originator. Specialized services - tailor-made services necessary to carry out work on the development of a new business idea. Evaluation of "demo day" support services - in the event of a positive report on the support, the Originator will be obliged to present the results of the support to the International Assessment Panel (ending the support process) under the Baltic Sea DEMO DAY.

5.6.1 Group of activities leader

Group of activities leader

A 2.5

5.6.2 Title of the group of activities

100 / 100 characters

5.6.3 Description of the group of activities

The evaluation of the support services will end with the international event "BSR Demo day for Women Refugee" - in the case of a positive support report, i.e. the implementation of all milestones in the project, the Originator will have the opportunity to present his idea to an international evaluation panel consisting of representatives / experts of the project partners (completing the support process) and the audience.

The rules of operation of the Evaluation Panel: panel participants will evaluate the Originators according to, inter alia, the following criteria:

- assessment of the business model: its individual elements,
- assessment of competences and potential of the originator / originators,
- the way of presenting the project: highlighting the elements of the business model emphasizing the substantive value of the presented project,
- evaluation of the offered product: is there a product with minimal functionality that can be offered to customers,
- the manner and effect of market tests.

An international panel of experts will decide whether or not to invest in the idea. In the event of a positive assessment, a new start-up will be created as a legal entity.

Two forms of startup support will be tested:

a) a capital entry into the newly created enterprise (P1, P3, P4, P5) - less than 50% of shares and approx. EUR for the purchase of tailor made services for a start-up as a contribution to the exchange of less than 50% of shares in a new enterprise. The company will be established based on a cash contribution from the investment incubator (project partners) and the contribution of the originator / originators (possibly other investors). Details will be specified in the bilateral investment agreement, regulating mutual obligations of partners in the field of capitalization, managing the company's affairs, supervision and establishing milestones for its development, determined on the basis of the business plan (developed during the incubation stage).

b) Support for prototyping, testing and marketing of start-ups products (P2, P6) - project partners will support the creation of a start-up, help them solve current problems, challenges, help find investors, sales markets, networking, internationalization, etc. depending on their needs

The originator who receives the support will be obliged to account for the activities carried out to the partner who provided him with the support. It is assumed that in the pilot phase 3 new start-ups will be supported by each partner, a total of 21 start-ups.

Post-incubation - final activities in the pilot phase aimed at maximizing the results achieved by chosen startups and their incubation results, cooperation with the company or VC, cooperation with the recipient of technology or VC fund, participate in job shadowing etc.

As part of the task, a report on the pilot action will be created along with the monitoring and evaluation system and a set of tools developed as part of the pilot action.

Description of the deliverable

Pilot Action Reports including joint report BSR Demo Day event -it will contain a description of the effects of testing hypotheses developed models, as well as conclusions from the implement. as well as guidelines and recommendations for the final version of incubation program. Each pilot develops a visualization presentation kit elements of its action(e.g. photos, videos). It will contain:

- Ongoing monitoring of activities by verifying compliance with the assumptions, cost analysis, collecting comments on the implementation enabling taking preventive measures.
- Joint peer review based on a common methodology.
- Qualitative evaluation, measuring the impact of the solution on, inter alia, the target group, the situation of these people, the increase in the quality of life of refugee women, social change and the functioning of the local community, as well as the results of peer review and reports on pilot actions constituting the basis for creating recommendations for the final version of the incubation program.
- Based on the results of AP, a comprehensive set of tools for the implementation of the developed and tested models, including Operational Manual, Candidate Assessment Tool, Support Concepts, Webinars and Training, Quality System, Technical Knowledge, Marketing Package, etc. which will be available on the platform.
- Joint report Demo Days event-Joint report will summarise the results of previous activities and actions including BSR Demo Day for showcasing and pitching ideas and will measure the impact on the target group.

Work package 3

5.1 WP3 Transferring solutions

5.2 Aim of the work package

In Work Package 3, communicate and transfer the ready solutions to your target groups. Plan at least one year for this work package to transfer your solutions to the target groups, considering their respective needs. Select suitable activities to encourage your target groups to use the solutions in their daily work. Organise your activities in up to five groups of activities. Describe the deliverables and outputs as well as present the timeline.

5.5 Target groups

	Target group	How do you plan to reach out to and engage the target group?
1	<p>Interest group</p> <p>Refugee women from areas affected by military activities (mostly Ukraine, Syria). Female refugees who came to partner countries. All EU members and their economies will benefit from professional activation of vulnerable groups of refugees but what is the most relevant, war immigrants will be supported with professional, long term business oriented help.</p> <p>355 / 500 characters</p>	<p>They will be involved at every stage of this WP. They will work to promote the creator support program in the project. Their representatives will be members of the emerging BSR transnational fund for women refugees. They will take part in regional meetings promoting and disseminating design solutions. They will tell stories and present good practices. Their involvement will be necessary for the sustainability of the project and the dissemination of its results. Further support for refugee women after the end of the project under the created Fund.</p> <p>552 / 1,000 characters</p>
2	<p>Business support organisation</p> <p>BSO from partnership regions - Poland, Norway, Denmark, Estonia, Lithuania, Latvia, Sweden. The sectors of business support are business development, digitalization, recruitment, work environment and internationalization. The partners are business support organizations from Sweden, Latvia, Denmark, Estonia and Norway and Poland, but all partners will collaborate with local business support organizations. Project partners will also work with BSOs from other BSR countries</p> <p>474 / 500 characters</p>	<p>They will be involved at every stage of this WP. They will contribute to the emerging BSR transnational fund for women refugees. They will work to promote the support program created in the project. They will take part in regional meetings promoting and disseminating design solutions. Also in the transnational meeting. They will present good practices resulting from the piloting. Their involvement will be necessary for the sustainability of the project and the dissemination of its results. Further support for refugee women after the end of the project under the created Fund</p> <p>580 / 1,000 characters</p>

	Target group	How do you plan to reach out to and engage the target group?
3	<p>Education/training centre and school</p> <p>The project focuses on the creation of friendly economic environment (eco-system) for woman entrepreneurs and innovators originating in Ukraine and others nations in a similar situation. Organizations with best practices and data co-creation methods and living lab models in an international environment. The partners will engage education /training centre and school and collaborate with them to promote education among refugees.</p> <p style="text-align: right;">477 / 500 characters</p>	<p>They will be involved at every stage of this WP. They will contribute to the emerging BSR transnational fund for women refugees. They will work to promote the support program created in the project, especially in the education sector. They will take part in regional meetings promoting and disseminating design solutions. Also in the transnational meeting. They will present good practices resulting from the piloting concerning educational activities. Their involvement will be necessary for the sustainability of the project and the dissemination of its results. Further support for refugee women after the end of the project under the created Fund</p> <p style="text-align: right;">650 / 1,000 characters</p>
4	<p>Small and medium enterprise</p> <p>The project will collaborate with many sectors to test the pilot services in a real environment, especially sectors that include providing special programmes for migrants. This target group is reached throughout the Baltic area, especially in Sweden, Latvia, Denmark, Estonia and Norway and Poland. SMEs will be engage in Stakeholders groups and the ecosystem of supporting women refugees</p> <p style="text-align: right;">389 / 500 characters</p>	<p>They will be involved at every stage of this WP. They will contribute to the emerging BSR transnational fund for women refugees. They will work to promote the support program created in the project, especially in the SMEs sector. They will take part in regional meetings promoting and disseminating design solutions. Also in the transnational meeting. They will present good practices resulting from the pilot project regarding cooperation and involvement of SMEs. Their involvement will be necessary for the sustainability of the project and the dissemination of its results. Further support for refugee women after the end of the project under the created Fund</p> <p style="text-align: right;">662 / 1,000 characters</p>
5	<p>Regional public authority</p> <p>The key role of regional public authorities is to influence strategic decision making, so it considers remote work environments as a part of the area's appeal. Other sectors are local service development, entrepreneurship, learning and infrastructure. All partners will collaborate with regional public authorities. Consultation of the developed solutions; analysis of the co-financing possibilities of proposed activities, as a part of available regional programs</p> <p style="text-align: right;">464 / 500 characters</p>	<p>They will be involved at every stage of this WP. They will contribute to the emerging BSR transnational fund for women refugees. They will work to promote the support program created in the project, especially among public authorities and at the political level. They will take part in regional meetings promoting and disseminating design solutions. Also in the transnational meeting. They will present good practices resulting from the pilot in terms of cooperation and political commitment. Their involvement will be essential for the project's sustainability, dissemination of its results, and political changes related to specialist support for refugee women. Further support for refugee women after the end of the project under the created Fund</p> <p style="text-align: right;">749 / 1,000 characters</p>

5.6.2 Title of the group of activities

Establish a common, democratically managed transnational BSR investment fund for Refugee Women

94 / 100 characters

5.6.3 Description of the group of activities

Establishing a transnational franchise fund that will contribute to strengthening the mission of the organizations
 The task will include: Meeting of all partners on the transnational joint, democratically managed fund to support women refugees and appointment of the Fund Steering Committee and selection of the fund management. The aim of the Fund will be to increase the durability of the franchise system after the project implementation period and to strengthen relations within the system and its development. The appointed Project Steering Committee will adopt assumptions for the transnational Fund in accordance with the assumptions adopted in WP1. The fund will be democratically managed by all participants of the system and will be at their disposal. The method of collecting and spending its resources and the fund's operation plan for the next min. 3 years after the end of the project, including networking meetings of fund members, allocation of funds from the fund to activities strengthening the entire system, creating and increasing brand visibility, training, study visits and other expenses related to the strengthening, development and maintenance of the fund.

Indicators

Output indicators				Result indicators		
Output indicators	Total target value in number	Project outputs	Please explain how the solution presented in this output serves the target group(s).	Result indicator	Total target value in number	Please explain how organisations in the target groups within or outside the partnership will take up or upscale each solution.
RCO 84 – Pilot actions developed jointly and implemented in projects	6	N/A	N/A	RCR 104 - Solutions taken up or up-scaled by organisations	N/A	<p>Various institutions within and outside the project will be able to benefit from the project outcomes. The solutions have been designed with their practical aspect in mind, in a way that allows easy implementation in another regions, regardless the location and specificity of the entity that will undertake this action.</p> <p>The developed materials, tools, guides and programs can be freely transferred and implemented elsewhere. When designing tools, apart from their usability, also the user-friendliness will be taken into account.</p> <p>The increase in the number of refugees in the BSR countries and the European Union will result in greater demand for the solutions proposed by the project. The created BSR Transnational Fund for Refugee Women can be expanded in the future and new organizations will be able to join it. This will definitely contribute to increasing the durability of proposed solution and providing long term support to refugee women after the end of the project.</p> <p>The proposed system will be adaptable to the needs of solving also other socio-economic problems or challenges and can be used by various local stakeholders operating in different thematic areas, e.g. by non-governmental organizations, social enterprises or cultural institutions.</p>
RCO 116 – Jointly developed solutions	N/A
