

HyTruck

Monthly Breakfast Briefings

Developing a transnational network of hydrogen refuelling stations for trucks

How can public authorities design a transnational hydrogen refuelling stations (HRS) network that is economically and environmentally sustainable, based on common standards, meeting haulier's needs and taking regional specifics into account? Answering these questions and delivering a transnationally agreed spatial development concept for HRS is the objective of the HyTruck project.

HyTruck invites you to hear and share the latest information related to HRS

HyTruck hosts monthly occurring transnational meetings for all parties interested in topics related to hydrogen refueling stations. The events are called "Breakfast Briefings" and they are arranged on the first Wednesday of each month, from 09:00 to 10:00 CET. The platform for the meetings is Microsoft Teams and an invitation with the updated agenda will be sent one week prior each event.

The Breakfast Briefing is an excellent opportunity to hear the latest news and development steps on the HRS network designed and built in the Baltic Sea region.

HyTruck Breakfast Briefings

- A platform for HRS related information exchange and discussions
- Arranged every first Wednesday of the month from 9:00 to 10:00 CET
- Remote meeting through Microsoft Teams
- Interesting topics and speakers with novel information
- Event open to all stakeholders and interested parties
- Registration to events: QR-code or <https://link.webpolsurveys.com/S/8DB19B24E7CF5265>
