Checklist for the provider of digital services

Cybersecurity Strategy:
Develop a comprehensive cybersecurity strategy that addresses potential threats
and vulnerabilities in your digital services.

User Data Protection:
Implement robust measures to protect user data, including encryption,
secure storage, and access controls.

Compliance with Data Privacy Laws:
Ensure strict compliance with data privacy regulations, such as GDPR,
and regularly audit data handling practices.

Regular Security Audits:
Conduct regular security audits to identify potential weaknesses in your digital services.
Stay informed about threats, and participate in cybersecurity communities

Incident Response Plan:
Establish an incident response plan to handle and mitigate cybersecurity incidents.

Employee Cybersecurity Training:
Provide thorough training for employees on cybersecurity best practices
to minimize the human factor in security incidents.

Third-Party Security Assessments:
Conduct regular security assessments of third-party services
and tools integrated into your digital services.

Continuous Monitoring:
Implement continuous monitoring tools to detect
and respond to security threats in real-time.

Secure Development Practices:
Incorporate secure coding practices into the development process
to prevent common vulnerabilities.
