# SUSTAINABILITY ROADMAP

The roadmap provided is not a manual; it's a tool for marina operators to evaluate investment options and strategies for developing the marina in line with the needs of future boating. The future boat owners care about the facilities and services at marinas, but they also value sustainability efforts. It's important to understand that investments in ecological and social sustainability don't just benefit the environment and society—they also ensure the marina's economic sustainability in the long run.
