

VERKOT VESILLE '25

Welcome to Verkot Vesille networking event!

What is it about?

Verkot Vesille event brings water sector organisations and future experts together. This year there will be a panel discussion on the social significance and resilience of the water sector. In addition, based on last year's feedback, we have arranged more time for free networking and the opportunity to continue networking in the form of a more relaxed evening out.

Participation is free for everyone and all organizations that operate in the water sector are welcome.

We invite university students, secondary students and young professionals in the field as guests. We want to offer organisations the opportunity to network with energy and environmental engineering, electrical and automation engineering, information and communication technology, construction and community engineering, and university students.

Where and when?

The event will be held on Wednesday 15 January 2025 at 13.00-17.00 at Joukahaisenkatu 7, Turku, EduCity, 2nd floor & Taito stairs.

Event Schedule

13:00 - Doors open coffee available

13:30 - Rector Vesa Taatila's opening speech

13:45 - Panel Discussion- Social Significance, Resilience and Cybersecurity in the Water Sector

14:45 - Free networking and snacks
