

Program: Study visit Norway' Circular Farmplastic

Changes to the program may occur.

Monday oct 05th – Våningshuset, Hellerud farm, (address: Bråteveien 198, 2013 Skjetten)

- 17:00** **Welcome and project overview**
Bastian Edi Hoffmann, Project Manager
- 17:20** **Hellerud farm – the biggest little farm on a road towards regenerative lighthouse.**
Hilde Tveiten Døvre, Norges Vel.
- 17:45** **From a farmer view and Bondelaget** – Eline Stokstad Oserud is a farmer and employee in Bondelaget. She will share how the farm plastic starts its journey from the farm and tell us how the organisation work on farm plastic.
- 18:15** **Panel talk – The future of a circular farm plastic value chain**
- 18:45** **Walk and talk at Hellerud Farm**
- 19:00** **Dinner**

Tuesday 6 October – Venue: Våningshuset, Bråteveien 198, Skjetten

09:00 Welcome

09:10 How has Lier Municipality addressed the issue of plastic?

Kjell Warholm

10:00 Farm plastic systems and value chain – a short overview of Norway, Finland, Estonia, Lithuania, Poland

11:30 Break

11:45 NORSIRK - From Farm to Waste Collection: Experiences with Mobile Agricultural Plastic Collection in Norway.

Stian Holmen, Sales and Marketing Director

12:15 Lunch

13:15 Farm visits and equipment demonstrations

Bus departure from the farmhouse (Våningshuset).

Practical solutions for managing agricultural plastics.

How can managing agricultural plastic become easier in a busy farming day? We visit two farms using hydraulic balers and explore how the farmers handle their plastic, from use and sorting to compaction and delivery for recycling. They share their experiences with investment, time, costs and what it takes to make these solutions work in practice.

Farm 1:

Ole-Andreas Kinnsbekken, Kløfta – managing plastic on a cereal and dairy farm

Address: Kåstadvegen 38, 2040 Kløfta

At Ole-Andreas Kinnsbekken's farm, we see how plastic from cereal and dairy production is sorted, stored and compacted using a hydraulic baler. Why did he choose this solution, and how has it affected work on the farm? We explore practical routines and experiences with keeping plastic clean, transport and delivery for recycling.

Farm 2:

Ingemund Tjelmeland, Leirsund – integrating a plastic baler into everyday farm operations

Address: Kongsrudveien 147, 2015 Leirsund

At Ingemund Tjelmeland's dairy farm, we learn how a hydraulic baler fits into the farm's plastic management routines. He demonstrates his setup and shares what works well, the challenges involved and what other farmers should consider before choosing a similar solution.

Expert presentations and hands-on demonstration

During the farm visits, Fredrik Stenseth Ruud from Felleskjøpet discusses different types of plastic, product choices and key considerations for both use and recycling. He also presents efforts to increase the recycled plastic content of products.

Charles from Eco-nor demonstrates a mechanical plastic baler, with an opportunity for participants to try it themselves. There will be time for questions, discussion and sharing experiences of the solutions on display.

17:00 Arrival at X Hotel

Wednesday 7 October

08:00 Bus departing from X Hotel

09:00 Arrival at [Områ](#)

Guided tour of the facility in groups of 15, with a maximum of two groups.

09:10 Introduction to Områ

An overview of Områ, a safety briefing and an introduction to Plastretur and agricultural plastics.

Facility tour for Group 1; presentation for Group 2

09:40 Jan Petter from Grønt Punkt Norge (Green Dot Norway) presents producer responsibility, the organisation's role and how the fee system for agricultural plastics works.

10:10 Facility tour for Group 2; presentation for Group 1

Presentation: The final recycling process – farm plastic.

10:45 Per Haakonsen, project manager, [PolymerTrade](#)

11:30 Bus departure from Områ

Arrival in Ås and lunch

12:00 Guided tour of the Ås campus.

13:00 Vitenparken, meeting room

NIBIO – presentation Biodegradable mulch films: Benefits, limitations and lessons from Norwegian field studies. Claire Coutris, NIBIO, included Q&A, group discussions.

Recovering and recycling agricultural mulch films can be costly and difficult because the plastics are often contaminated with soil, plant and pesticide residues. Biodegradable mulch films offer a potential alternative, but what happens when they are left in the field? Using examples from Norwegian field and laboratory studies, this presentation will explore how biodegradable mulch films degrade in soil, how they interact with pesticides, and what this means for the use of agricultural plastics in a circular economy.

13:10 This session will provide a basis for discussion among project partners on experiences with biodegradable and conventional mulch films across different agricultural, environmental and waste-management contexts.

NIVA – presentations:

14:00 The changing use and recycling prospects for agricultural plastics in Norway: *How to prevent environmental pollution.* Line Johanne Barkved, NIVA, included Q&A, group discussions.

Microplastics in soils and crops: Current knowledge and key measures based on the PAPILLONS project. Luca Nizzetto, NIVA.

14:50 Microscope session

15:15 Closing remarks for external participants v/Bastian Edi Hoffman, project manager

15:30 Bus departing for X Hotel

16:30 Arriving X Hotel

Optional: public train to Oslo for tourist purpose.

Thursday 8 October

- 08:30** X Hotel: Internal project meeting
- 11:30** Wrap up
- 12:00** Lunch
- 13:00** Walk to the bus stop
- 13:20** Airport shuttle from Hellerud bus stop.

Practical information:

If you want to travel from X-Hotel to Oslo city center: Take bus number 380 from the Hellerud bus stop to Oslo Bus Terminal. The trip takes about 35 minutes, and buses run every 30 minutes.

Download the app [here](#) to view the timetable and purchase tickets.

Uber – 20 min drive.

Transportation airport:

The easiest way to get from Oslo Gardermoen Airport to X Hotel is by the airport shuttle bus (FB1). The bus departs every hour at quarter past the hour from platform 11. The journey takes approximately 25 minutes to the **X Meeting Point** stop. The return trip to the airport 08 oct is also by airport shuttle bus. The bus departs from **Hellerud at 13:19** and arrives at the airport at approximately **14:00**. <https://www.flybussen.no/en>

Price: 279 NOK one way

Uber is also an option from the airport – check prices in the app.

Hotel:

X Hotel,

address: Kragerudveien 50, 2013 Skjetten.

phone: +47 23 96 64 80
